

NETFLIX BUSINESS CASE STUDY

Number of titles released over the years:

1991-2007 (Netflix is a DVD by mail service):

- Till year 2007 Netflix business model was primarily based on renting DVDs via mail.
- It had monthly subscriptions which allowed users to unlimited movies in a month with a limit of number of DVDs per rent.
- That is at 7.99 USD a month a customer could get one DVD out on rent at once unlimited times for that month but another DVD would be rented only when the first one is returned
- This model had its problems since due to increasing popularity of internet movies were being pirated and could be watched for free also returning and then acquiring a new title took a substantial amount of time.

2007-2020(Era of binge watching begins):

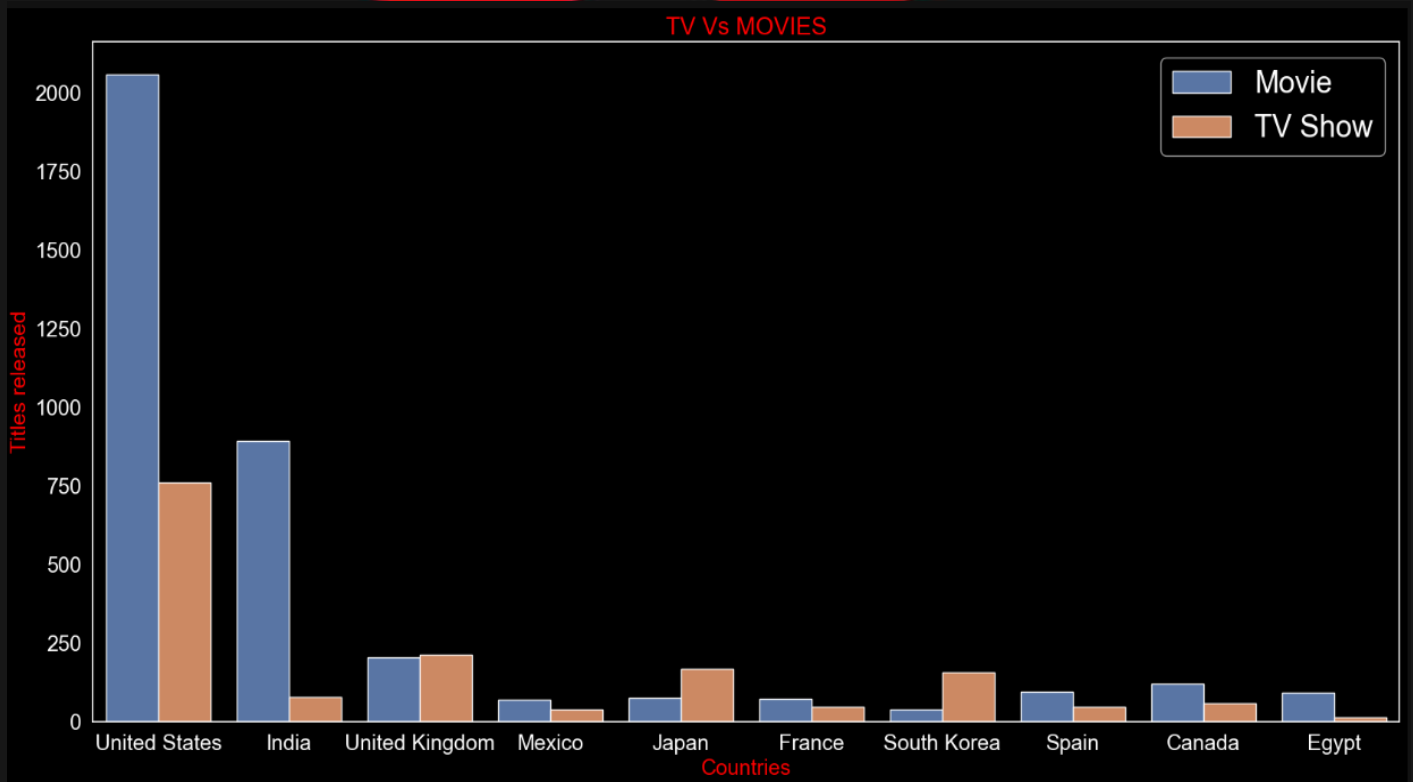

- **Internet boom:** In 2007 Netflix started streaming service and due to increasing usage of internet at that time the user base expanded rapidly.
- **More options:** Since the users could be provided multiple titles at once without the cost of physical copies it was feasible to provide with more options to the users which was also beneficial for popularizing the platform. Now could provide 100s of titles at fingertips with no wait time to return the title to acquire a new one
- **Better legal alternative:** It also reduced the problem of piracy to some extent since it provided a superior, user friendly and more convenient legal alternative.

2020-2021(Era of masks and sanitizers):

- **Production Halts:** The pandemic led to widespread production delays and shutdowns, affecting the release schedules of many titles.
- **Content Acquisition:** With production slowed, Netflix increased its licensing of existing content to maintain a steady stream of offerings. But many titles were being acquired by the competitors as well like Amazon Prime hence the offerings added reduced.

Movies Vs TV Shows:Regional Trends

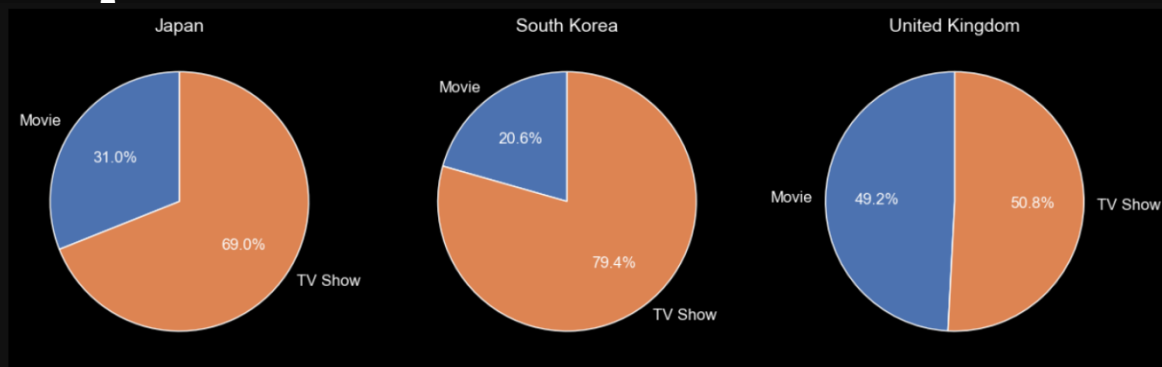

Content mix across top Netflix markets:

- South Korea has the highest disparity: 79.4% of releases are TV shows.
- Japan has 69% TV shows; UK is nearly balanced.
- High popularity of Anime and K-Drama drives TV show production in Japan and South Korea.

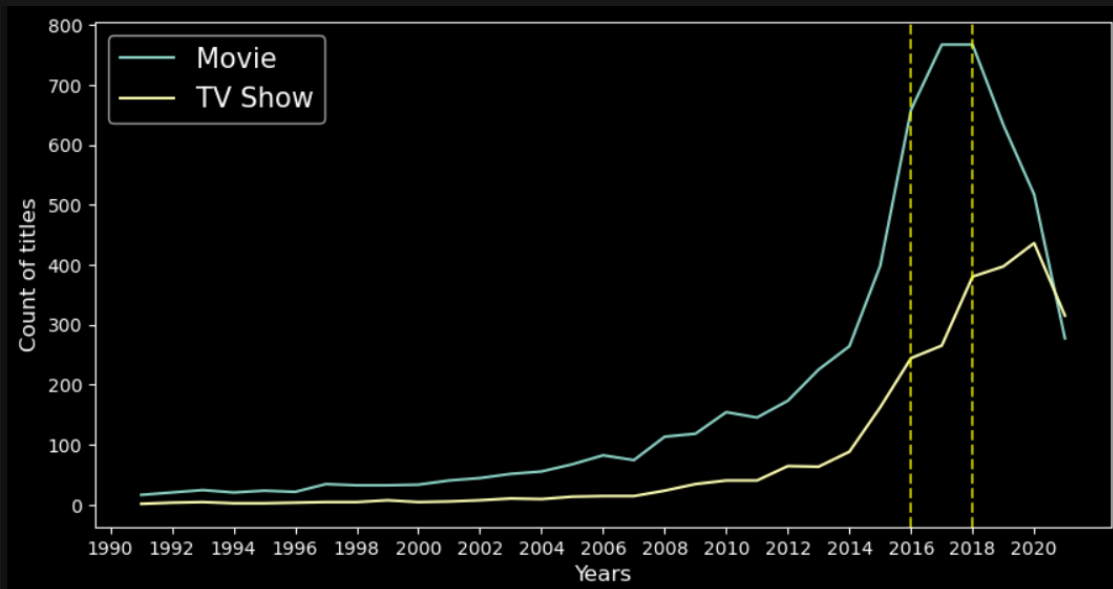

Japan and South Korea: The Land of Anime and K

Drama

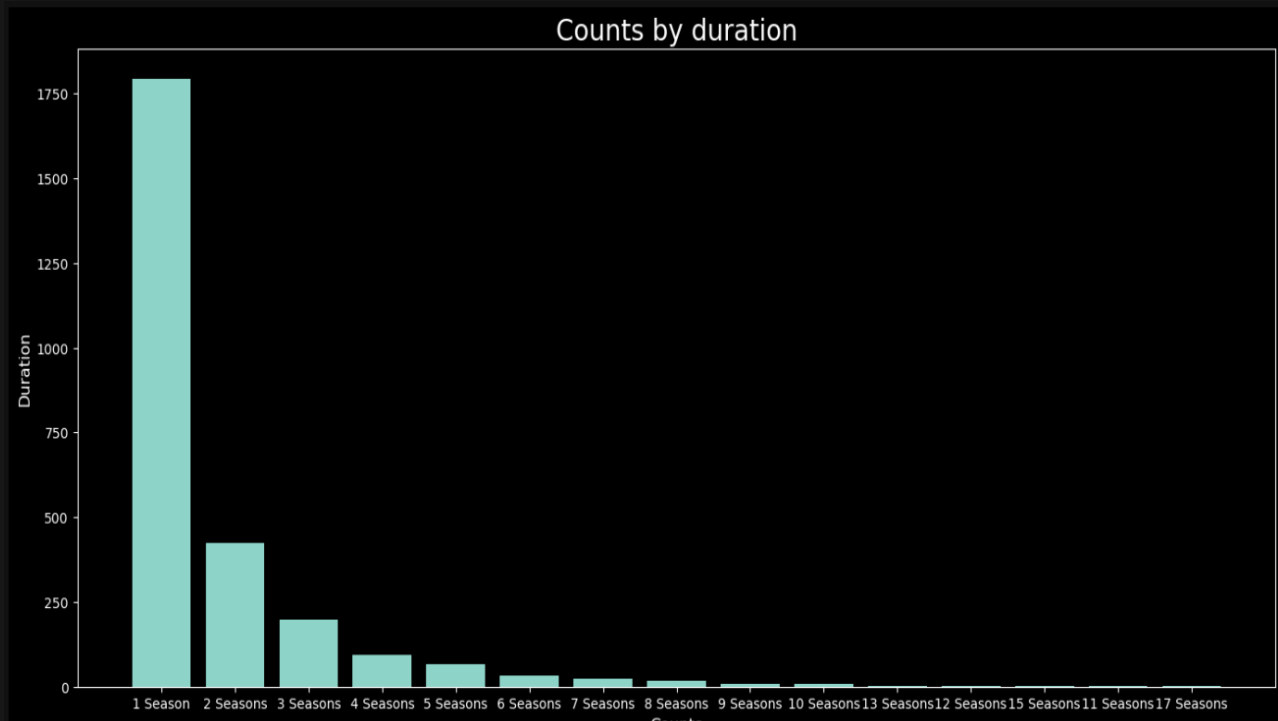

- It is clear that the 2 countries where way more TV shows are released compared to other countries are Japan and South Korea.
- Many TV shows are released in UK as well but the disparity of TV shows and movies is not as significant as Japan and South Korea
- South Korea has highest disparity with 79.4% releases comprising of TV shows
- Japan has 69.0% releases comprising of TV shows and UK has 50.8%
- More releases of TV shows compared to Movies in Japan and South Korea are mainly due to the popularity of Anime and K Drama in Japan and South Korea respectively.

From Silver Screen to Streaming Series:

- It can be seen that the gap between the number of movies vs shows being released was increasing from 2000s but both the number of movies and TV shows being released were increasing steadily.
- Around 2016 and 2018 the difference between number of movies vs number of tv shows released was the highest
- From 2018 onwards the number of movies released took a larger dip compared to the number of TV shows being released and likely due to the covid pandemic the popularity of TV shows increased hence more TV shows were being acquired by Netflix hence the disparity was nominal around 2020-2021.

TV Show Duration vs Popularity

- It is clearly visible that the TV shows spanning multiple seasons are less popular compared to the ones which have limited seasons.
- Shows with 1 season are released the most and a negative relationship is observed in the number of titles added and the number of seasons

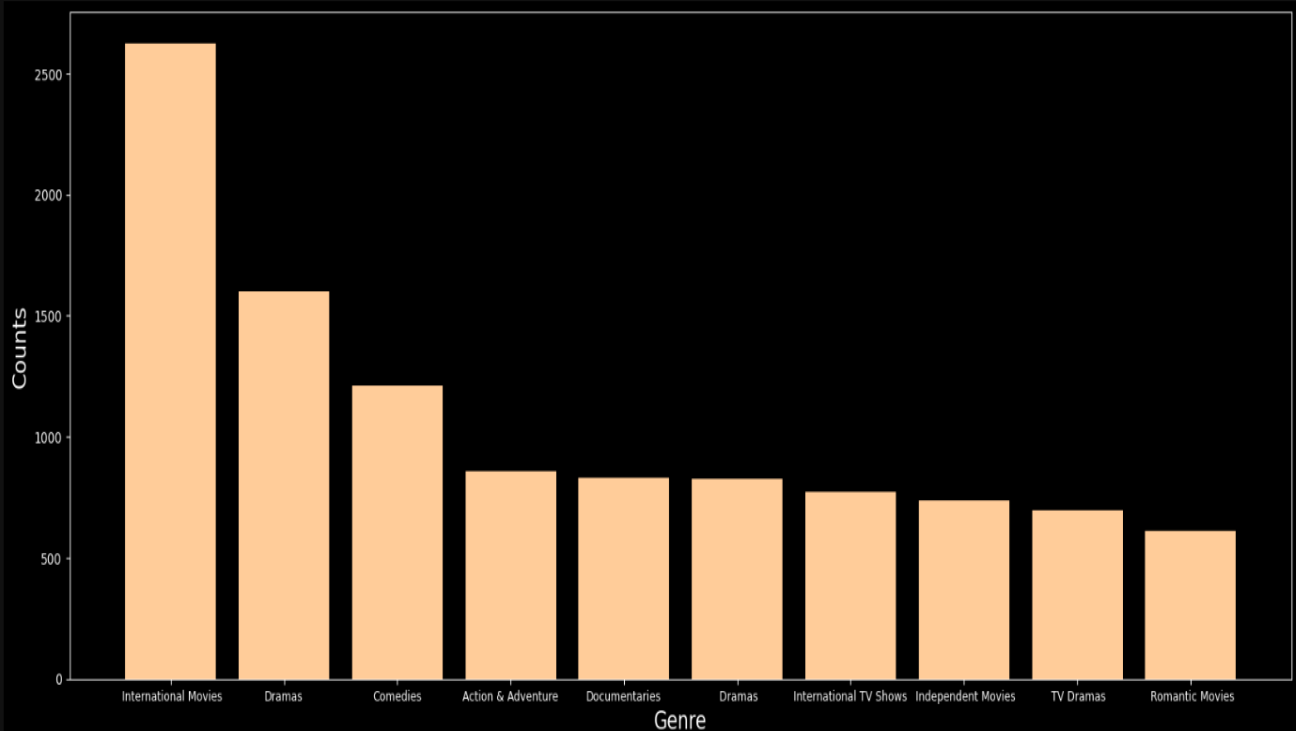

What should Netflix do:

- faster rise in movies pre-2018 shows a push to grow library size quickly.
- The pandemic period shows TV shows were less affected than movies in some cases, hinting at potential production flexibility or differences in resource requirements.
- Moving forward, Netflix may want to maintain a balanced mix, as both types of content are important for subscriber retention. Especially due to increasing popularity of K-Dramas, Anime etc around the world hinting at increasing popularity of shows.

- Netflix should focus on TV shows with number of seasons ranging from 1 to 5.
- Due to high popularity of TV shows in South Korea and Japan Netflix should focus on releasing more long format content such as Anime and K-Drama to Japan and South Korea.

Regional and Genre insights

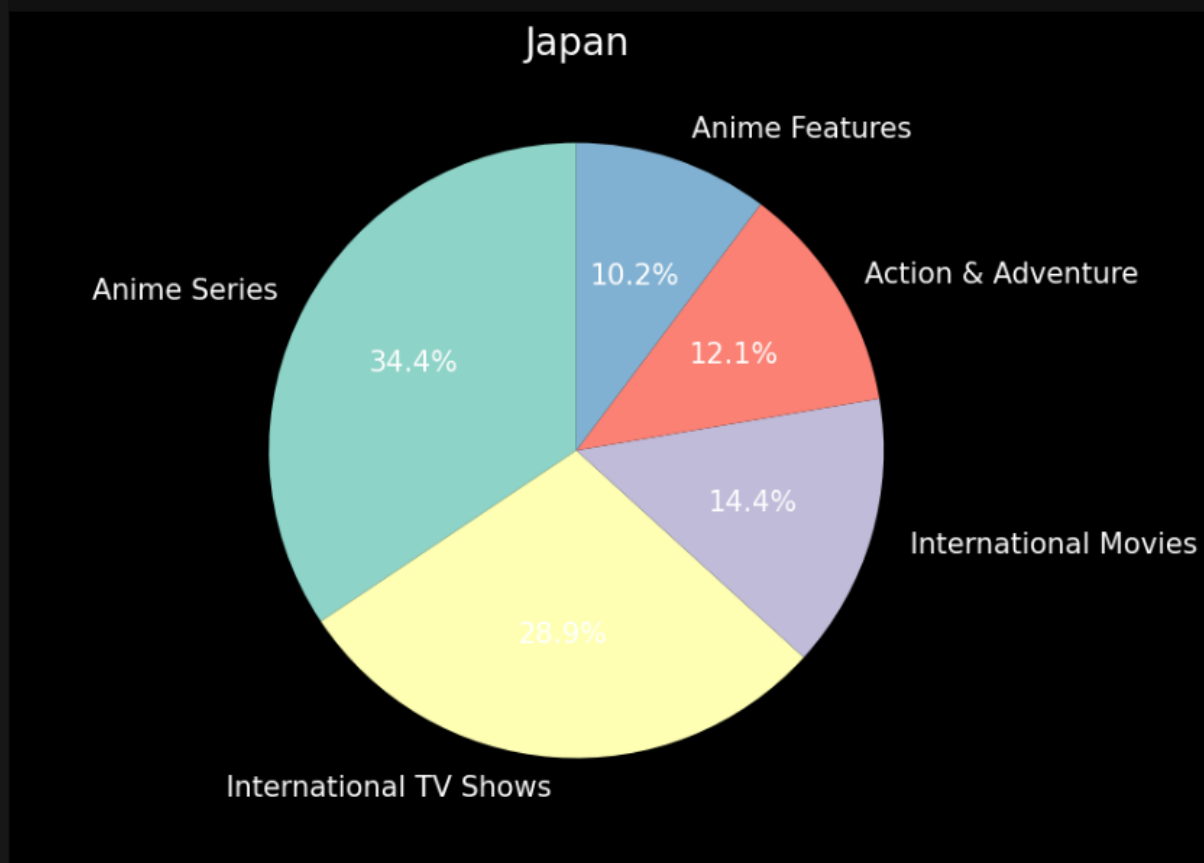

Genre Analysis: What Type of Shows and Movies Are Most Common?

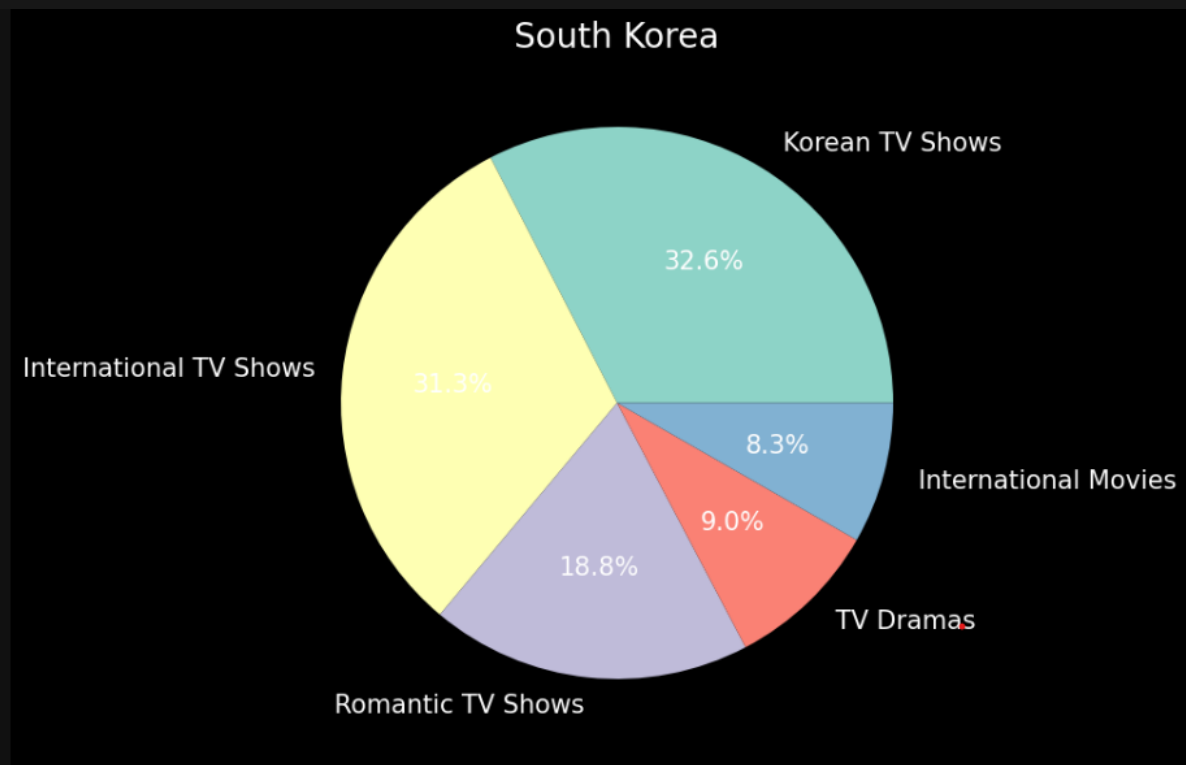

- We can see that most popular Genre is international movies, Dramas ,Comedy and Action & Adventure
- International movies,Dramas,Comedy are significantly more popular than other Genres
- Other than top 3 rest of the Genres do not have much disparity between them

Popular genres regionally:

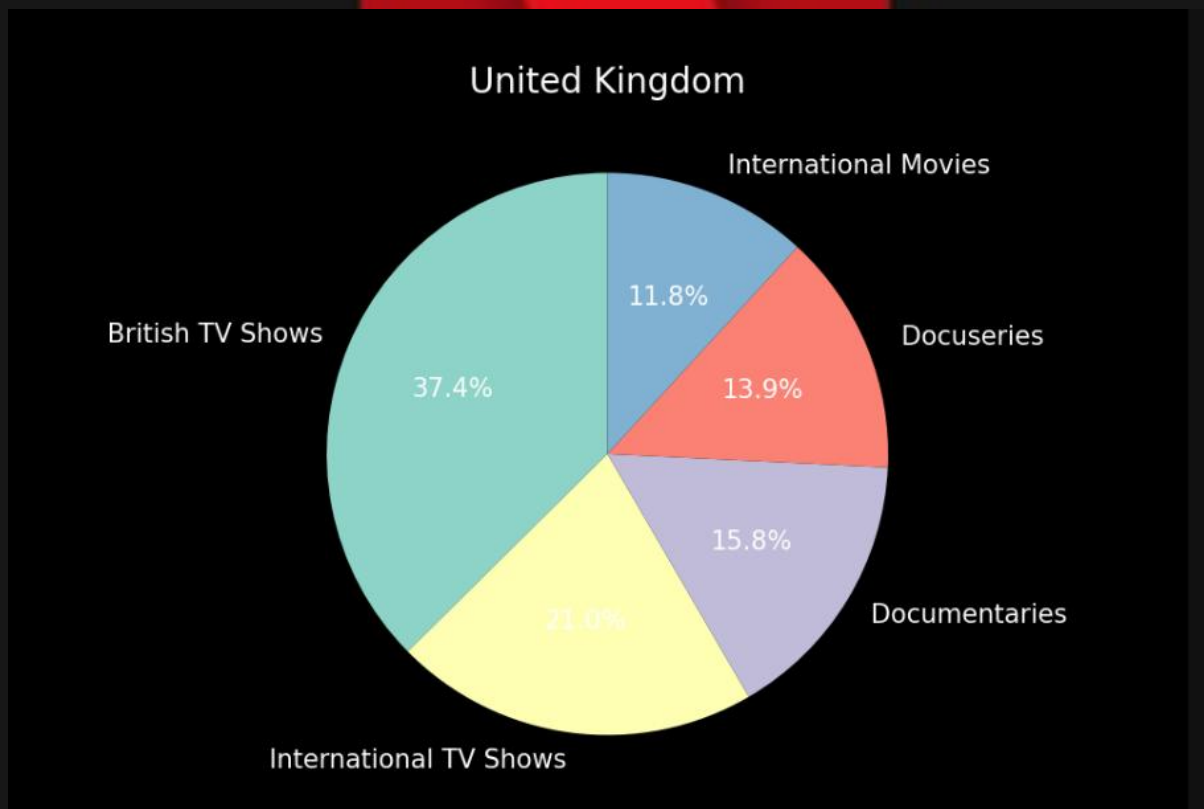

Since we saw earlier that South Korea, Japan and UK are exceptions when it comes to popularity of TV shows and movies hence we will analyze which types of Genres are more famous there.

- In Japan highest contribution in overall titles released is of Anime and international TV shows.

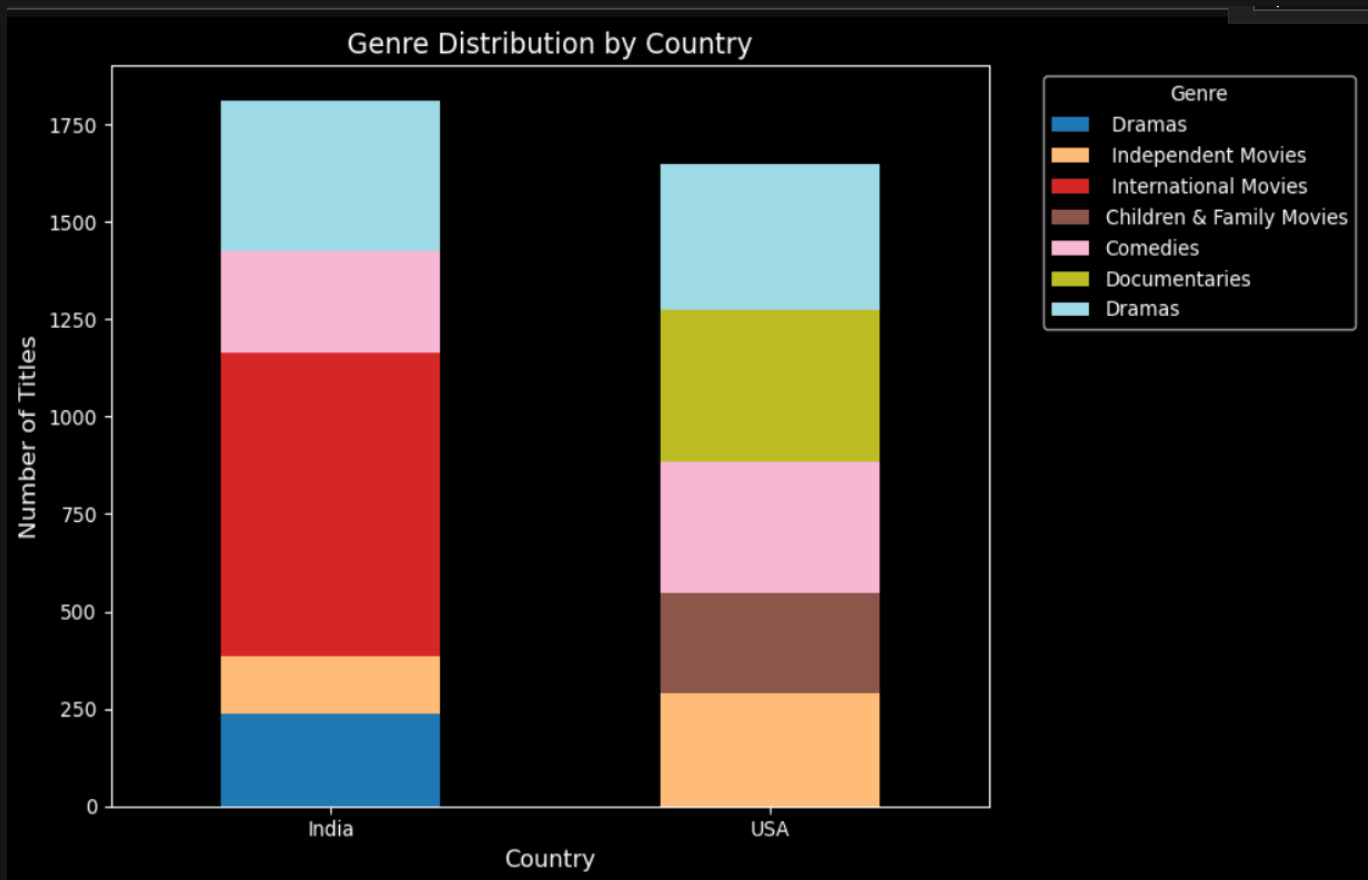

- It is clearly evident that highest contribution in South Korea is of Korean TV shows, International TV shows and Romantic TV shows

- In UK Most popular Genres are British TV shows,International TV shows and Documentaries.

Now we will do a side by side comparison of 2 countries which have highest number of Netflix releases and see which Genres are most popular.

- It is evident that in India international Movies are more popular along with Dramas
- In USA Dramas,Documentaries,comedies,Children and family friendly movies are more popular however not much disparity can be seen among the top Genre distribution in USA

What should Netflix do:

- On analysis of South Korea, Japan and UK it is clearly visible that what dominates the most in such countries are International movies and second their own regional TV shows since UK has British TV shows as most popular, Japan has anime and South Korea has Korean Drama which proves the dominance of the region based content in these countries.
- Netflix should focus on creating regional TV shows for these countries and also add popular International TV shows.
- In India International TV shows are most popular by significant margin along with dramas hence focus should be on these 2 genres.
- In USA there is not vast disparity among any top Genre hence a balance should be maintained in releases.

Actors & Directors Analysis

Top 10 directors globally by total titles released:

	director	count
1	Rajiv Chilaka	19
2	Raúl Campos, Jan Suter	18
3	Suhas Kadav	16
4	Marcus Raboy	16
5	Jay Karas	14
6	Cathy Garcia-Molina	13
7	Martin Scorsese	12
8	Youssef Chahine	12
9	Jay Chapman	12
10	Steven Spielberg	11

- Director who produced the most titles which released on Netflix is **Rajiv Chilaka** with **19** titles who is known for creating titles like Chhota Bheem which is popular among Indian kids.
- Other most titles producing directors include Raul Campos, Jan Suter, Suhas Kadav, Marcus Raboy etc.

Top 10 directors globally by productivity:

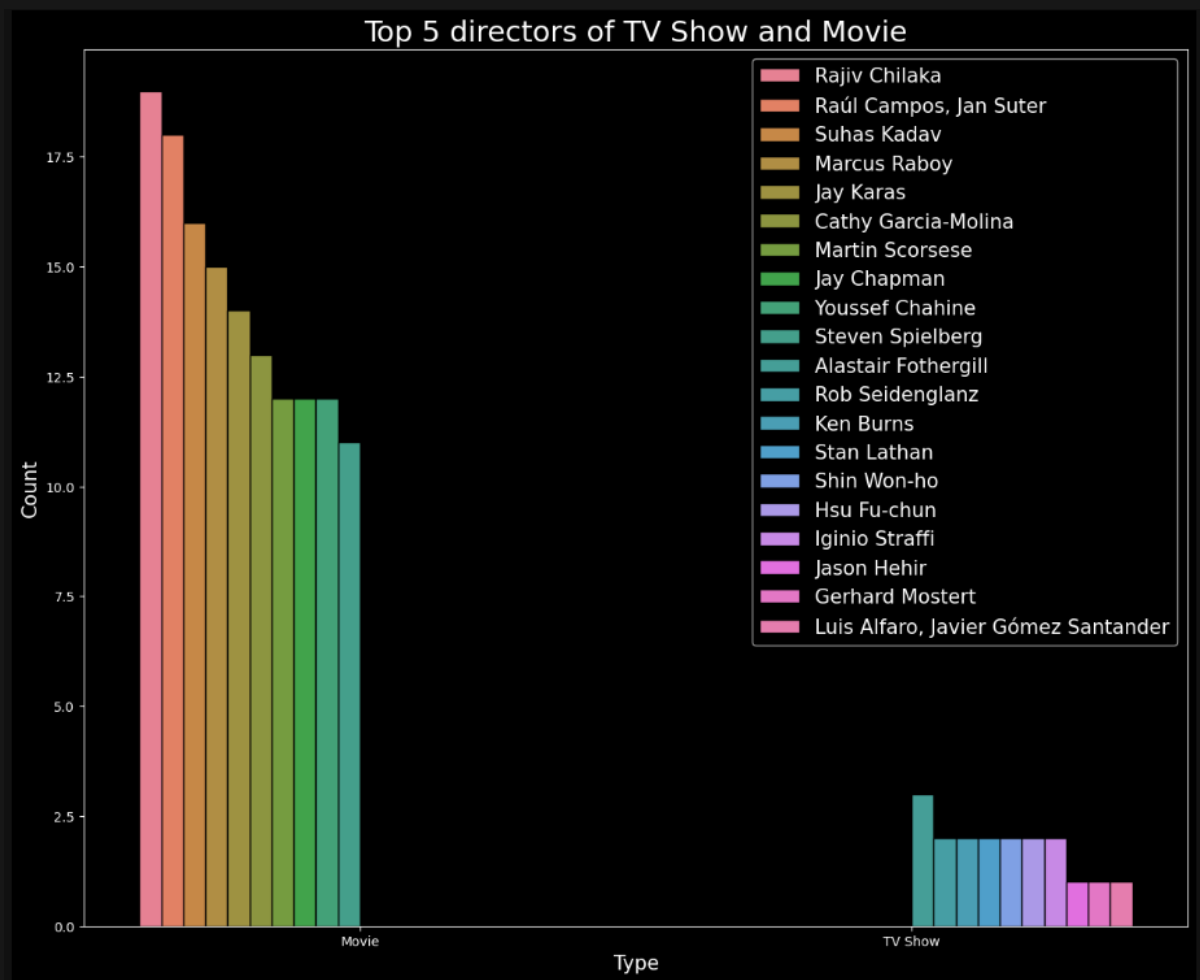

We will determine productivity on the basis of how many titles have produced per year that is for how many years the director has been active for and how many titles the directors has produced in that duration.

	director	titlecount	years_active	Productivity
1	Rajiv Chilaka	19	9	2.111111
2	Raúl Campos, Jan Suter	18	2	9.000000
3	Marcus Raboy	16	8	2.000000
4	Suhas Kadav	16	6	2.666667
5	Jay Karas	14	8	1.750000
6	Cathy Garcia-Molina	13	11	1.181818
7	Martin Scorsese	12	52	0.230769
8	Jay Chapman	12	6	2.000000
9	Youssef Chahine	12	45	0.266667
10	Steven Spielberg	11	41	0.268293

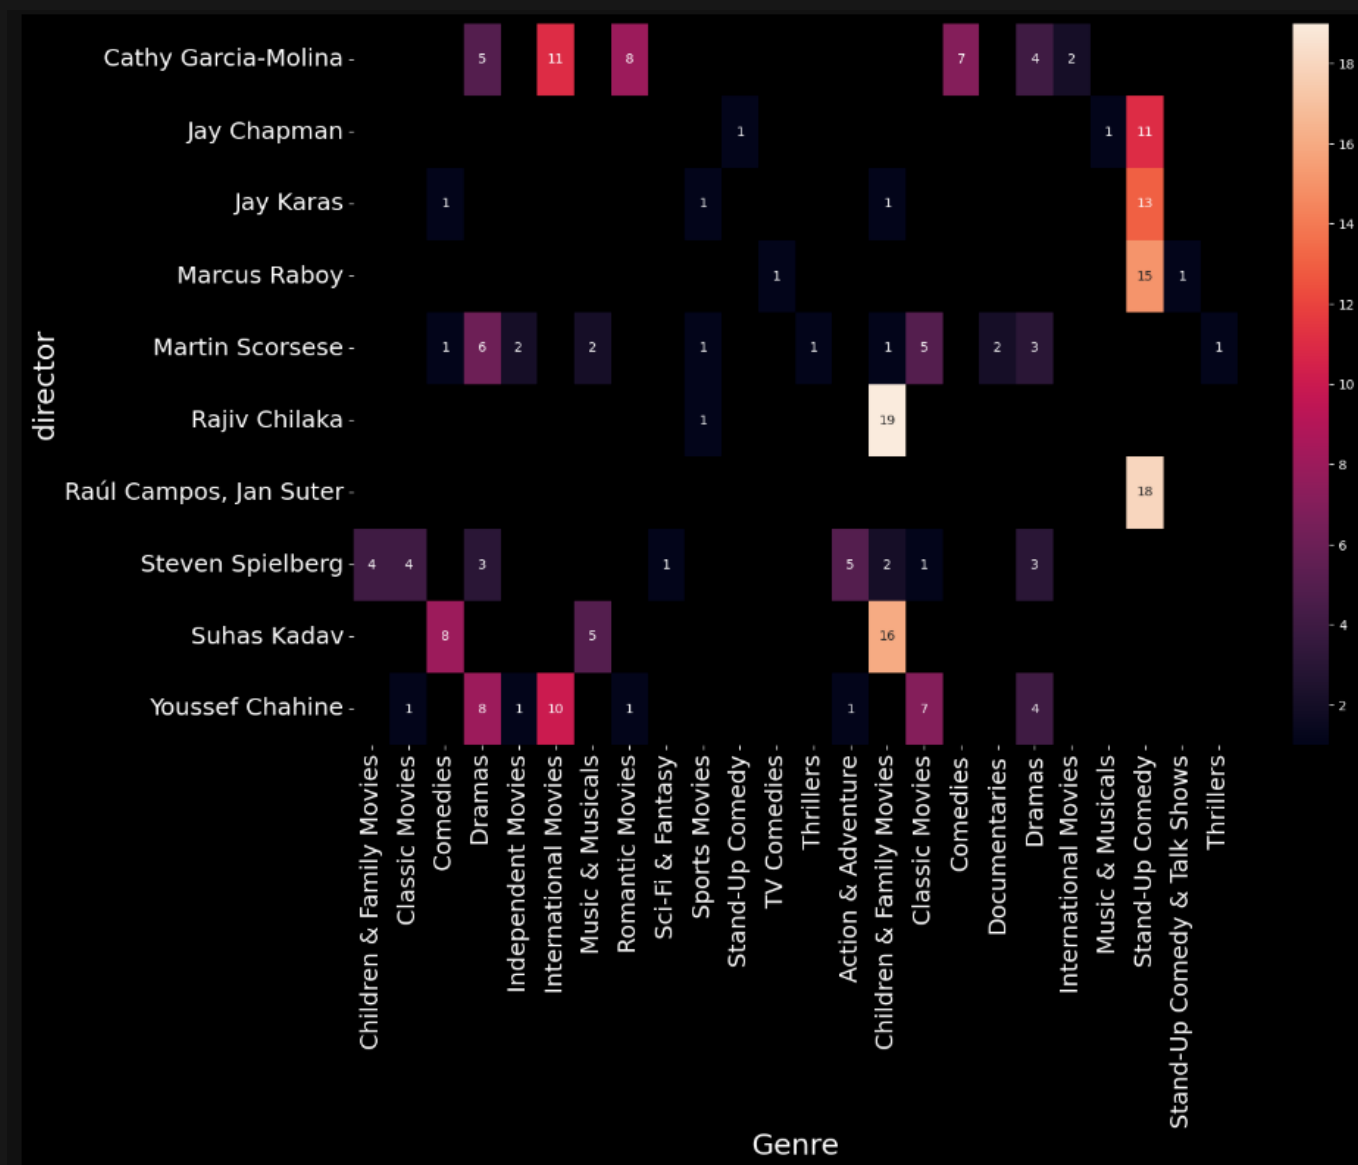

- We can see that there are some changes in the top 10 directors when their productivity is taken into account

- Rajiv Chilaka maintains the top position however Suhas Kadav loses a position and comes on 4th where as Marcus Raboy turns out to be the 3rd most productive director.
- Jay Chapman is and Youssef Chahine both have 12 titles but Jay Chapman is productive since he achieved the same in lesser time.

Top 10 directors each of Movie and TV Show:

- Alastair Fothergill is the top director from TV Show with 3 titles followed by Ken Burns, Stan Lathan, Shin Won Ho, Hsu-Fu-Chun with 2 titles each to their names.
- None of the top 10 directors from TV shows and Movie overlap.

High-Volume Directors by Genre:

- Director Rajiv Chilaka focuses heavily on Children & Family Movies (19 titles).
- Director Raúl Campos, Jan Suter is strong in Stand-Up Comedy (18 titles).
- Director Suhas Kadav is versatile, producing in Children & Family, Comedies, and Music & Musicals.
- Director Cathy Garcia-Molina produces in International Movies, Romantic Movies, Comedies, and Dramas, showing diversity.

- Director Youssef Chahine has multiple genres, including International Movies, Dramas, Classic Movies, and Romantic Movies.

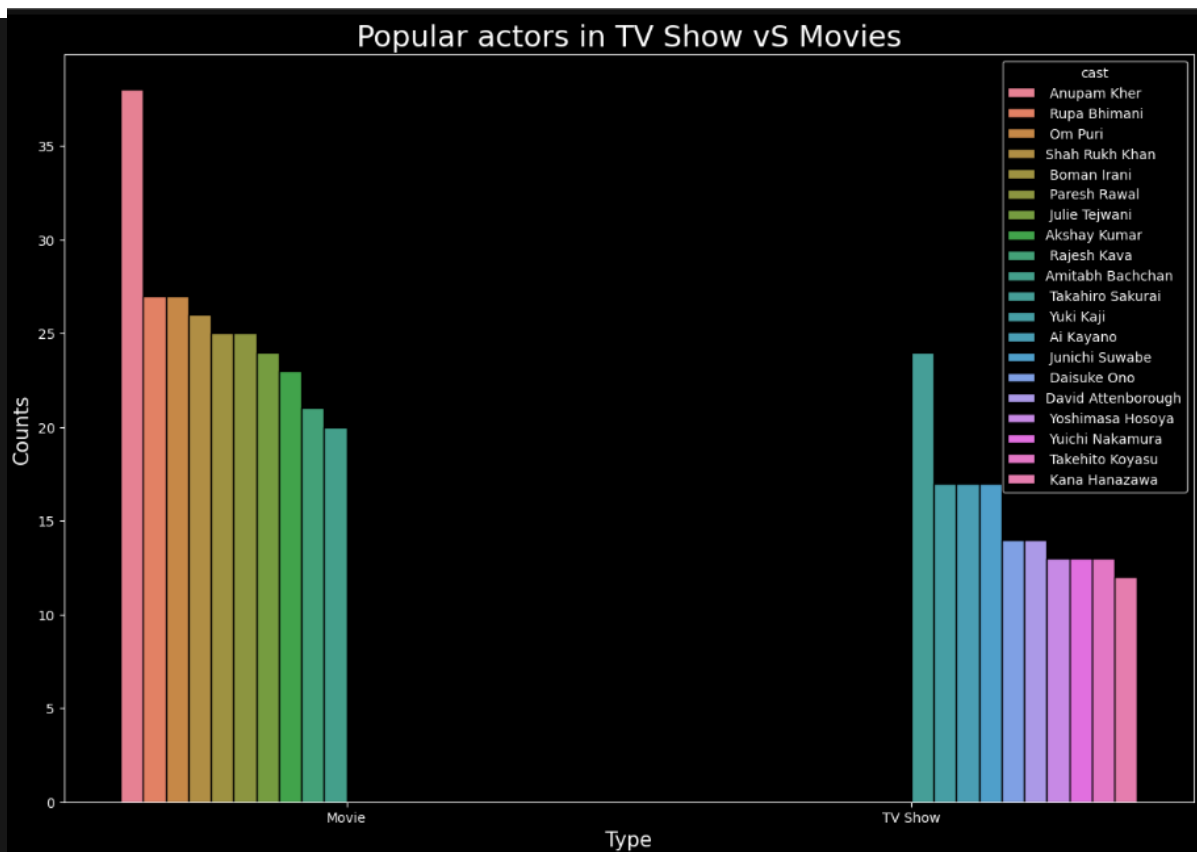

Genre Popularity by Production Volume:

- Based on total titles across all directors (rough estimation):
- Children & Family Movies: High production (Rajiv Chilaka, Suhas Kadav, Steven Spielberg, Jay Karas, Martin Scorsese) → strong content pool.
- Stand-Up Comedy: High production (Raúl Campos, Jan Suter, Marcus Raboy, Jay Karas, Jay Chapman) → significant niche audience.
- Dramas: Multiple directors (Cathy Garcia, Youssef Chahine, Martin Scorsese, Steven Spielberg) → steady content.
- International, Classic, and Comedies: Moderate production, suggesting room to grow.
- Less Common Genres: Sports, Sci-Fi & Fantasy, Thrillers, Independent Movies → fewer titles, potential under-served markets.
- Some directors are highly specialized (e.g. Rajiv Chilaka in Children & Family, Raúl Campos, Jan Suter in Stand-Up Comedy).
- Some directors are multi-genre producers (e.g., Youssef Chahine, Suhas Kadav) → versatility may attract cross-genre audiences.

Duplication/Fragmentation

Some genres have multiple directors producing only 1–2 titles (e.g., Sports, Thrillers, Independent Movies). This indicates niche areas with fragmented content, which could be aggregated for audience targeting.

Top 10 actors Movies Vs TV shows:

- The data reveals two strong content clusters — Bollywood films (Movies) and Japanese anime (TV Shows).
- Movies dominate in volume and star power, with recurring Indian actors like Anupam Kher and Shah Rukh Khan driving content visibility.
- TV Shows are smaller but internationally diverse, led by Japanese voice actors and global documentary names.
- The platform shows regional strength but audience segmentation — Indian users likely favor movies, while global users engage with anime.

What should Netflix do?:

With respect to directors:

- Expand Popular Genres to Attract Core Audience
- Strengthen Children & Family Movies and Stand-Up Comedy as these have high content volume and are proven popular.
- Highlight director-specific collections to create loyalty around creators (e.g., “All Movies by Director Rajiv Chilaka”).
- Invest in Underserved Niches
- Genres like Thrillers, Sci-Fi & Fantasy, Sports, Independent Movies have fewer titles. Investing in these could attract new audience segments with lower competition.
- Cross-Genre Recommendations
- Since some directors produce across multiple genres the platform can use algorithmic recommendations:
 - Example: “If you like Cathy Garcia’s International Movies, try their Romantic or Comedy titles.”
 - This increases engagement and time spent on the platform.
- Promote Multi-Director Collections
- Create collections like: “Top Stand-Up Comedy Directors” or “Children & Family Favorites” to leverage volume and visibility.
- Leverage Niche Content for Global Reach
- International and independent films can appeal to global markets. Expanding subtitles, dubbing, and regional marketing could attract new geographic audiences.
- Highlight New and Rare Titles
- Low-volume genres and rare director contributions can be marketed as exclusive or “hidden gems”, increasing curiosity-driven engagement.
- Use Data-Driven Promotions
- Focus on high-production directors and genres for featured banners.
- Target low-production genres with curated recommendations for niche audiences.

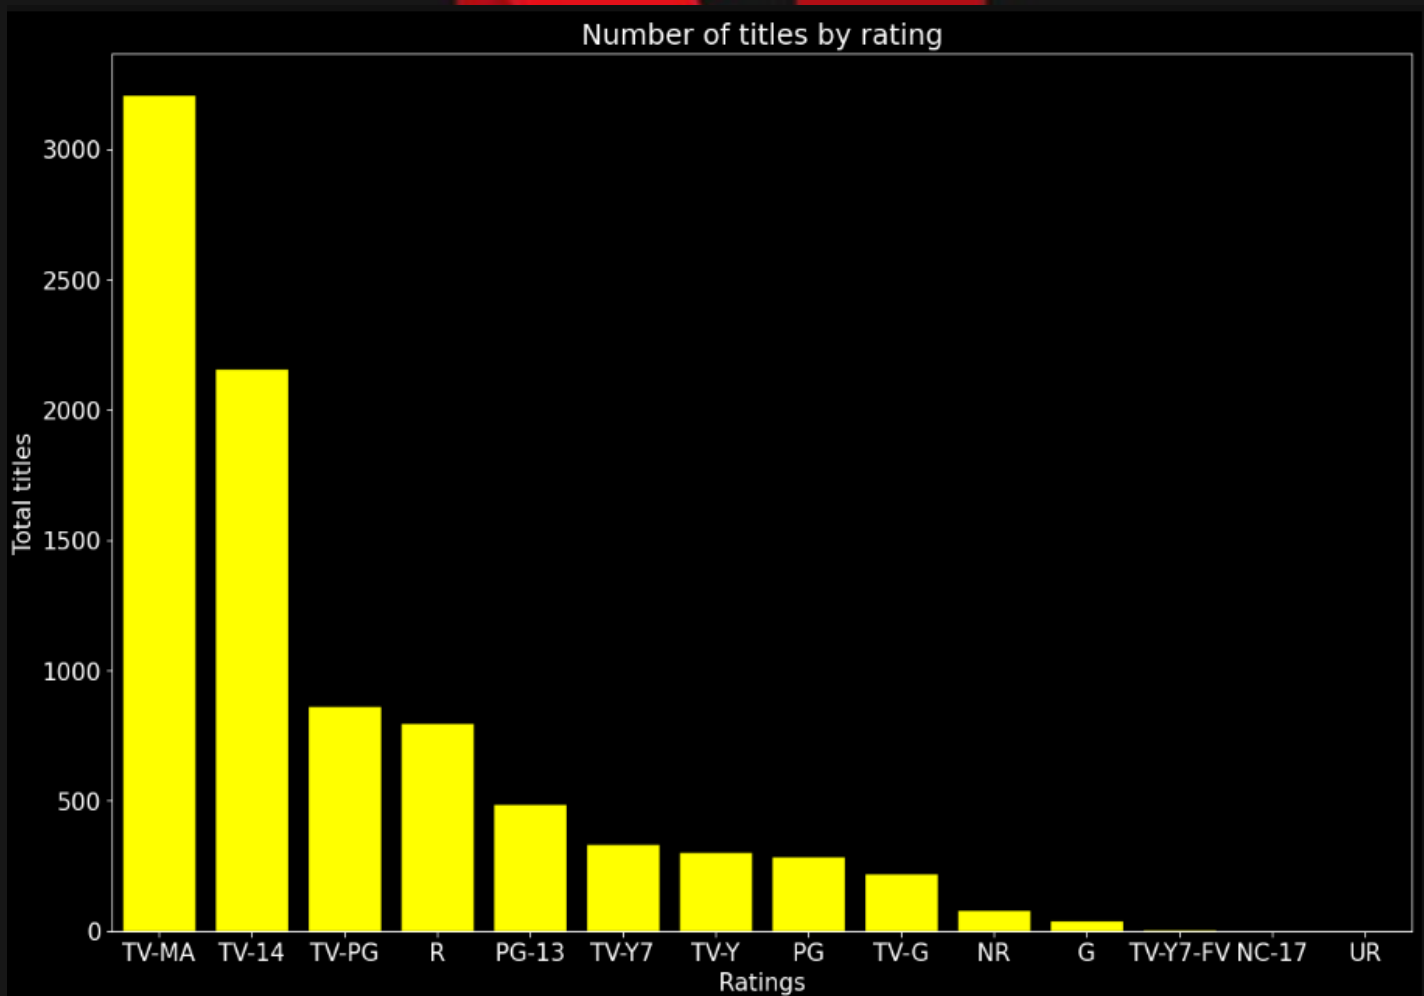

With respect to actors:

- Deepen both categories: invest in more Bollywood titles and expand anime/serialized content.

- Leverage star-driven marketing — curated collections and actor-based recommendations.
- Bridge regional audiences through cross-genre discovery (e.g., emotional storytelling across cultures).
- Localize and globalize — dubbed/subtitled versions to make Indian content global and anime accessible regionally.

Ratings / Classification Analysis:

Distribution of Netflix ratings by Movies vs TV Shows:

Mature Content Dominates the Catalog:

- TV-MA (3,207 titles) and TV-14 (2,160 titles) together make up the majority of content.
- These ratings generally indicate content suitable for older teens and adults (violence, language, mature themes).
- The platform's content distribution leans heavily toward mature, adult-oriented entertainment.

Limited Family and Kids Content

- Ratings like TV-Y, TV-Y7, PG, and G together form only a small fraction of the catalog.
- Children & Family-friendly content is underrepresented, with fewer than 10% of total titles in this category.
- The platform's family/children audience segment may be underserved.

Moderate Representation of General Audiences:

- PG-13 (490) and TV-PG (863) form a mid-tier group, catering to both teens and families.
- This segment could serve as a bridge between mature and kids' content but currently has moderate presence.
- There is some balance but it is not a major strategic focus area.

Niche or Rare Ratings Have Minimal Presence:

- NR (80), NC-17 (3), UR (3), TV-Y7-FV (6) — extremely low counts.
- Indicates that the platform maintains standards compliance and avoids excessive explicit or unrated content.
- Suggests content curation and moderation, likely maintaining brand safety.

Content Skewed Toward Streaming Originals or Modern TV:

- The dominance of TV ratings (TV-MA, TV-14) over movie ratings (R, PG-13, etc.) indicates that the platform focuses heavily on serialized and streaming-native content.
- The content is likely optimized for modern, bingeable TV audiences rather than traditional film viewers.

What should Netflix do?:

Diversify Content by Expanding Family-Friendly Titles:

- Increase production/acquisition of TV-Y, TV-G, and PG-rated content — especially animation, family dramas, and educational series.
- This would help attract families and younger audiences, an underutilized segment.
- Expands audience base and balances the catalogue profile.

Retain Core Adult Audience Through Quality Curation:

- Continue producing premium TV-MA and TV-14 content — crime thrillers, mature dramas.
- Focus on quality over quantity, ensuring variety within mature genres.
- Keeps existing core users engaged and loyal.

Use Ratings for Personalized Discovery:

- Integrate rating based filters or recommendations for example:
 - “Looking for something light?” TV-PG & PG titles
 - “Mature thrillers you can’t miss” TV-MA content
- Helps users find suitable content faster and increases satisfaction.
- Enhances personalization and user experience.

Expand Safe Viewing Modes:

- Add Kids Mode or Family Profiles that automatically restrict to TV-Y/PG content.
- Market these features to households with children.

- Builds trust and inclusivity across demographics.
